

*Sub F2* > 4. (Amended) The method of claim 3 wherein reordering the product further comprises:

determining an address to which the product was previously shipped;  
verifying the address; and  
causing the reordered product to be shipped to the address.

*Sub F3* > 6. (Twice Amended) A machine-readable medium having instructions stored thereon to implement an electronic commerce World Wide Web page, the sequences of instructions, when executed by one or more processors, cause one or more electronic systems to:

*f3*  
provide access to a set of products available for electronic ordering by a user;  
monitor products ordered by and shipped to an address associated with the user;  
and  
provide, automatically, in response to subsequent accesses by the user a list of products previously ordered by the user and shipped to the address.

*Sub F5* > 9. (Amended) The machine-readable medium of claim 8 wherein the sequences of instructions that cause the one or more electronic devices to reorder the product further comprise sequences of instructions that, when executed by the one or more processors, cause the one or more electronic systems to:

determine an address to which the product was previously shipped;  
verify the address; and  
cause the reordered product to be shipped to the address.

*Sub F5*  
11. (Twice Amended) An apparatus comprising:

means for providing access to a set of products available for electronic ordering  
by a user;

*K5*  
means for monitoring products ordered by and shipped to an address associated  
with the user; and

means for providing, automatically, in response to subsequent accesses by the  
user a list of products previously ordered by the user and shipped to the address.

*Sub F6*  
14. (Amended) The apparatus of claim 13 wherein the means for reordering  
the product further comprises:

means for determining an address to which the product was previously shipped;  
means for verifying the address; and  
means for causing the reordered product to be shipped to the address.

*Sub F7*  
16. (Twice Amended) A networked server device to provide information  
related to products available for ordering by a user of a client device coupled to the  
server, the server device to monitor products ordered by and shipped to addresses  
associated with users that access the server device and to record products ordered by the  
users, wherein the server device provides one or more individual users, in response to  
subsequent accesses by the one or more individual users, with a list of products  
previously ordered by the respective users and shipped to the respective addresses.

*Sub F8*  
19. (Amended) The server device of claim 18 wherein the server device  
reorders the product in response to the product being selected from the list, and
